2021 International Conference on Forthcoming Networks and Sustainability in AIoT Era (FoNeS-AIoT) | 978-1-6654-1091-5/21/$31.00 ©2021 IEEE | DOI: 10.1109/FoNeS-AIoT54873.2021.00006

Message from the Program Chair

FoNeS-AIoT 2021

It is great honour to chair a conference that reflects the growing trend in artificial intelligence of things. Our aim is to develop and make FoNeS-AIoT the premier and extremely impactful conference on all aspects of Forthcoming Networks and Sustainability in AIoT Era. For this, strict review process was followed, even for work-in-progress, review/survey, and hands-on-demos, and technical papers.

This year's edition embodies a set of 60 papers, selected out of 130 through careful and rigorous peer review by excellent TPC members as best of the best submissions, thus yielding an overall acceptance rate of 46.92%.

It would not have happened without the earnest efforts of the TPC Co-Chairs (Prof. Dr. Bülent Bilgehan, Prof. Dr. Ali Okatan, and Dr. Muhammad Fahim) and organizers (Lec. Ahmad Rasheed, and Dr. Yöney Kırsal Ever) behind the scene. In particular, I grateful to Program Committee members and reviewers who did an outstanding job in carrying paper review tasks.

Jawad Rasheed, Ph.D
