Selcuk University Faculty of Vocational Education, TURKEY

Abstract

This paper aims to promote a training tool developed under LdV programme in footwear training in English, Romanian, Turkish and Greek. The virtual training centre is a good example of the development of innovative practices in the field of vocational education and training, which is one of Leonardo da Vinci General Objectives. Virtual training centre for Shoe Design (VTC-Shoe) was developed in 2007-2009 within a Project proposed by a consortium consisting of three Balkan countries (http://vtc.shoe-design.ro). The partners are Gheorghe Asachi technical University (Romania), Selcuk University (Turkey) and Technical University of Crete (Greece).

Key Words: Development of innovation, footwear training, virtual training, distance education.
